MFS

MOBILE WELDING FUME EXTRACTOR

The MFS is a mobile filter unit with integrated fan that provides extraction and filtration for use with a flexible extraction arm or extraction hose.

The MFS features an aluminum spark arrester and a round cellulose filter cartridge. This filter cartridge is provided with a precoat to extend the lifespan and the efficiency of the filter. The MFS is fitted with a *RoboClean* system for automatic sectionwise cleaning of the filter cartridge by (externally supplied) compressed air. The dust and dirt particles end up in the dust tray underneath the unit.

Thanks to the four transport wheels (two of which are swivel casters), the MFS is extremely suitable to be used in relatively small facilities or near sources of pollution without a fixed location.

Extraction arm/hose to be ordered separately.

APPLICATIONS

The MFS is intended to be used for the following applications:

- FCAW welding (annual use: >700 kg/1500 lbs)
- stick/MMAW welding (annual use: >500 kg/1100 lbs)

Do **not** use the MFS for the following applications or in the following circumstances:

- arc-air gouging
- aluminium laser cutting
- oil mist
- heavy oil mist in welding fume
- extraction of aggressive fumes and gases (e.g. from acids, from alkaline, from soldering paste containing lithium)
- extraction of hot gases (more than 45°C/113°F continuously)
- grinding aluminum and magnesium
- flame spraying
- extraction of cement, saw dust, wood dust etc.
- sucking cigarettes, cigars, oiled tissues and other burning particles, objects and acids
- explosive environments or explosive substances/gases
